

Modular Build

“Lakers” provide Modular Build services to the Process Industry; we work with many companies who require a planned & scheduled or re-active approach to pre-fabricated assemblies. All our systems are approved to ISO 9001:2000

Laker Vent won a contract for the shipment of supply, fabrication, testing and commissioning of a Slurry Oil Backwash System for Pall Filters of Portsmouth during 2007, this work involved the fabrication and erection of steelwork installation of free issue equipment, electrical power distribution and the fabrication and installation of pipework and ductwork. Laker Vent utilised in-house expertise for the steelwork and pipework, however we procured the services of three partner companies to provide the following services
 Electrical – Hunter communications
 Fabrication of Ductwork – Arrowbrook Engineering
 Insulation – Kitosns Environmental

Industrial Sectors Covered

Food, Brewing & Dairy
